Hosting options for the FORMÉ website

A simple comparison to help you choose. Prices checked on 9 November 2026.

OUR RECOMMENDATION

Truehost Starter: ₦18,000 for the first year.

It is the cheapest option with cPanel (an easy control panel), it takes naira and it includes a free .com.ng domain for the first year. Before you pay, we will ask Truehost to confirm that it can run FORMÉ.

If Truehost can't: use Namecheap Stellar Plus, about ₦49,000 for the first year.

What is hosting?

Hosting is the rented space on the internet where your website lives. It also holds your products and orders, and your business email mailboxes. You pay for it every year. All the plans below stay on all the time, so they don't "go to sleep" when the site is quiet.

The options side by side

Plan	First year	Each year after	Domain name	Control panel	Can it run FORMÉ?
Truehost Starter Our first choice	**₦18,000**	₦18,000	Free .com.ng for the first year	cPanel	Must ask first
WhoGoHost Premium	₦25,000	Not stated	Free .com.ng	Unclear	Must ask first
MokoHost Starter	₦32,250	Not stated	Free .com, .ng or .com.ng for the first year	cPanel	Must ask first
Namecheap Stellar	~₦37,000	~₦77,000	Check at checkout	cPanel	Yes, on paper
Namecheap Stellar Plus Our backup choice	~₦49,000	~₦117,000	Check at checkout	cPanel	Yes, on paper
Namecheap Stellar Business	~₦82,000	~₦177,000	Check at checkout	cPanel	Yes, on paper
HostAfrica Starter	~₦101,000	Not confirmed	Free .africa	DirectAdmin	Must ask first

"**Must ask first**" means the provider's website doesn't confirm everything FORMÉ needs. "**Yes, on paper**" means the provider's own documents list those things. FORMÉ hasn't been set up on any of these plans yet, so we will test it before launch.

"~" means an estimate from a US dollar price at about ₦1,370 to $1, so the final amount will move with the exchange rate. MokoHost's price includes 7.5% VAT, and other providers may add VAT at checkout.

What we need from you

1. **Your approval** of the plan: Truehost if it confirms, otherwise Namecheap Stellar Plus.
2. **The domain name** you want for the new website.
3. **The purchase in your own name and email,** so you own the account, then access for us to set up the website.

A closer look

Truehost Starter

Good: lowest price, 30 GB of storage, and room for about 25,000 visits a month by its own estimate. Paying 3 years upfront costs ₦45,900.
Watch out: we need its answer on the technical requirements, and we found no independent record of how often it goes down.

WhoGoHost Premium

Good: low price in naira, and this offer runs until 30 November 2026.
Watch out: only 8 GB of storage and 30 GB of monthly traffic, which is tight for a store with lots of photos. Its website suggests it may use DirectAdmin rather than cPanel.

MokoHost Starter

Good: priced in naira, with no fixed monthly traffic limit, daily backups and a 30-day money-back guarantee.
Watch out: only 15 GB of storage, the renewal price isn't stated, and we found few independent reviews.

Namecheap (Stellar, Stellar Plus, Stellar Business)

Good: a large international company, operating since 2001, whose documents list what FORMÉ needs. Stellar Plus has more capacity than Stellar and adds automatic backups. Stellar Business has twice the processing power of Stellar Plus, which helps during busy sales. Paying 2 years upfront costs about ₦75,000 for Stellar Plus or ₦147,000 for Stellar Business.
Watch out: you pay in US dollars and the price rises sharply at renewal. We also couldn't find .com.ng for sale there, so that domain may have to come from a Nigerian seller.

HostAfrica Starter

Good: strong customer reviews, with a 9.9 out of 10 trust score on Hellopeter.
Watch out: it has the highest first-year price here, and this plan uses DirectAdmin rather than cPanel. Network reliability is its lowest-rated area on Hellopeter (4.3 out of 5), and the tools we need to set up FORMÉ may require the Basic plan, about ₦137,000 a year.

Options we don't recommend for FORMÉ

WordPress hosting	Made for WordPress websites. FORMÉ is custom-built, not WordPress.
Reseller hosting	Made for people who sell hosting to their own customers.
VPS hosting	A private server that costs about ₦407,000 in the first year with cPanel on Namecheap, and it needs someone to look after it.
Supabase	Holds only the database, so you would still pay for hosting. FORMÉ would also need changes to work with it. Its free plan pauses after a week of inactivity, and the plan that doesn't pause starts at about ₦411,000 a year.

Good to know

- **Other yearly costs:** domain renewal, once any free first year ends. A .com.ng on Truehost is listed at ₦6,500 a year.
- **Automatic order emails:** we plan to send these through a separate email service called Brevo, so they are less likely to land in spam. We will check whether its free plan is enough.
- **Busy periods:** a very cheap plan can slow down during a big sale. If that happens, FORMÉ can move to a bigger plan or another provider.
- **Prices can change:** confirm the final amount at checkout before paying.
